English (Professional Working)
French (Professional Working)

Certifications

Microsoft Certified: Azure Developer Associate
iSAQB® Certified Professional for Software Architecture - Foundation Level
Professional Scrum Master I
VMware Spring Certified Professional 2024 v2

Honors-Awards

Rank 700
Android Trainer
Spring Trainer
Service Oriented Architecture Trainer

Ala BEN KHALIFA

Software Architect | CTO & Co-Founder | Microservices & Multi-Cloud (AWS + Azure) | Spring Certified
Tunis, Tunisia

Summary

Software Architect and Technical Leader with 6+ years of experience designing, building, and scaling cloud-native platforms across AWS and Azure. I specialize in microservices architecture, backend engineering, and infrastructure-as-code, with a strong focus on performance, scalability, and cost efficiency.

As CTO and Co-Founder of a Digital Out-of-Home advertising startup, I single-handedly architected and deployed the entire cloud platform on AWS — from infrastructure (ECS Fargate, RDS, ElastiCache, S3, CloudFront) to CI/CD pipelines (Terraform, GitHub Actions). The platform now serves enterprise advertisers including BYD, Tunisie Telecom, and Carrefour.

At MaibornWolff, a German technology consultancy, I've delivered architectural solutions for major automotive and industrial clients — from leading a team of senior engineers on a distributed platform with 10 microservices, to designing cloud migration strategies and API integration architectures on Azure.

I also teach Microservices Architecture (SOA) and Spring Framework at ENSIT, one of Tunisia's national engineering schools — because I believe that if you can't explain architecture clearly, you don't understand it deeply enough.

What I bring to the table:

- Multi-cloud architecture (AWS + Azure) with Terraform IaC
- Microservices design, event-driven systems, and API platforms
- Technical leadership — team mentoring, architecture decisions, stakeholder alignment
- Startup mindset — building from zero to production with enterprise clients
- 5 professional certifications: AWS SAA-C03, AZ-204, VMware Spring, iSAQB CPSA-FL, PSM I

Open to Software Architect and Tech Lead opportunities in the UAE and Saudi Arabia. Let's connect.

Experience

MaibornWolff GmbH

5 years 5 months

Lead Software Engineer

October 2024 - Present (1 year 5 months)

Promoted to Lead Engineer, taking ownership of technical leadership, team management, and architecture decisions across multiple enterprise client engagements.

- Led a team of 4 engineers (3 Seniors + 1 Lead) on a distributed platform with 10 microservices for a premium automotive brand, owning delivery and technical direction
- Architecting the migration of a production web application from standard Azure infrastructure to a proprietary Azure-based PaaS platform, designing a phased strategy ensuring minimal downtime and business continuity
- Reverse-engineered and codified existing Azure cloud infrastructure using Terraform (Infrastructure as Code)
- Designed and executed load testing strategies to identify system bottlenecks, delivering strategic recommendations for infrastructure scalability and cost-efficiency
- Designed API integration architecture using Azure API Management to synchronize factory data with internal systems
- Developed new features using Domain Driven Design, enhancing system performance for enterprise factory software

Tech: Spring Boot, Kotlin, Azure, Terraform, Azure API Management, .NET/C#, DDD, AWS, Kubernetes, MQTT, Load Testing

Senior Software Engineer | Spring & Mobile Developer

October 2022 - October 2024 (2 years 1 month)

Tunisia

Promoted to Senior Engineer on a distributed platform serving a premium automotive brand's global customer base through iOS and Android applications.

- Took on mentoring and coaching responsibilities, fostering a growth-oriented engineering culture
- Owned architecture decisions across 10 microservices built with Spring Boot (Java/Kotlin)
- Contributed to a distributed, event-driven architecture enabling real-time interactions
- Deployed and operated services on AWS with Kubernetes for container orchestration
- Integrated MQTT-based real-time messaging between backend services and mobile clients
- Drove CI/CD best practices, code quality standards via SonarQube, and automated testing strategies

Tech: Spring Boot, Kotlin, Java, Microservices, AWS, Kubernetes, Docker, MQTT, PostgreSQL, Firebase

Software Engineer | Spring & Mobile Developer
October 2020 - October 2022 (2 years 1 month)

Tunisia

Joined MaibornWolff to develop a distributed platform connecting a premium automotive brand's customers and dealers through iOS and Android applications.

- Designed and developed backend microservices using Spring Boot (Java/Kotlin)
- Built native Android applications using Kotlin, Jetpack Compose, and MVVM architecture
- Developed iOS applications using Swift and SwiftUI
- Migrated legacy Drupal backend to Spring Boot microservices, improving maintainability and performance
- Implemented real-time communication between services and clients using MQTT messaging protocol
- Worked with containerized deployments using Docker and Kubernetes

Tech: Spring Boot, Java, Kotlin, Swift, Android, iOS, MVVM, Jetpack Compose, Docker, Kubernetes, MQTT, PostgreSQL, Firebase

VERSE

Co-Founder & Technical Advisor @VERSE
October 2025 - Present (5 months)

Tunis, Tunisia

Co-founded a Digital Out-of-Home (DOOH) advertising startup that displays targeted advertisements on venue screens across restaurants, cafes, and bars, with planned expansion into the UK market.

Designed and built the entire cloud platform and software architecture:

- AWS infrastructure: ECS Fargate, ALB (WebSocket), RDS PostgreSQL 15, ElastiCache Redis 7, S3 + CloudFront, ECR, Secrets Manager, NAT Gateway
- Full infrastructure-as-code with Terraform and CI/CD via GitHub Actions
- Platform now serves enterprise advertisers including BYD, Tunisie Telecom, and Carrefour

Talan Tunisie

1 year 9 months

Junior Software Engineer | Spring & Angular Developer

September 2019 - October 2020 (1 year 2 months)

Tunisia

Developed and maintained Byblos, Talan Group's enterprise ERP system, leading a major architectural modernization initiative.

- Contributed to the migration from a Java EE / JSF monolithic architecture to Spring Boot / Angular microservices
- Decomposed monolithic components into independent, scalable microservices
- Implemented asynchronous messaging between services using RabbitMQ for improved system decoupling
- Developed new ERP features including financial reporting and analytics modules

Tech: Spring Boot, Angular, Java EE, JSF, RabbitMQ, PostgreSQL, Microservices Architecture

Intern

February 2019 - September 2019 (8 months)

Tunisia

Education

Ecole Supérieure Privée d'Ingénierie et de Technologies - ESPRIT

Engineer's degree, Computer Engineering · (2016 - 2019)

ISIM Monastir

Bachelor's degree, Electrical, Electronics and Communications
Engineering · (2012 - 2016)
